PROFESSIONAL SUMMARY

Cybersecurity graduate from George Mason University with hands-on experience in network security, digital forensics, and risk management. Demonstrated ability to apply technical knowledge through academic research in machine learning-based threat detection and digital forensics investigations. Currently pursuing CompTIA Security+ certification to further validate technical expertise. Seeking an entry-level cybersecurity or IT role where I can contribute while continuing to grow my knowledge within the field.

EDUCATION

Bachelor of Applied Science — Concentration in Cybersecurity

George Mason University, Fairfax, VA *December 2025*

Associate in Applied Science (A.A.S.) — Cybersecurity

Northern Virginia Community College, Manassas, VA *May 2024*

Graduated Magna Cum Laude

Network Engineering Specialist Career Studies Certificate

Network Administration Career Studies Certificate

CERTIFICATIONS

- **CompTIA Security+** — *In Progress (Currently Pursuing)*

EXPERIENCE

Land Rover Chantilly | **Loaner Administrator** | Chantilly, VA *February 2026 – Present*

- Managed customer information and handled sensitive records with accuracy and strict confidentiality.
- Delivered high-quality customer service in a fast-paced environment, consistently maintaining accuracy and professionalism under pressure.
- Proactively supported team members and contributed to streamlined daily operations through cross-functional collaboration.

George Mason University Projects — See Portfolio for Further Details

Machine Learning Cyberattack Detection Research

- Evaluated machine learning models for real-time cyberattack detection using public datasets.
- Analyzed performance tradeoffs between detection speed and model accuracy.

Digital Forensics Investigation

- Used Autopsy and FTK Imager to examine digital evidence and recover artifacts.
- Documented findings in structured forensic reports following professional standards.

SKILLS

• Network Security Fundamentals	• Risk Management / NIST Framework
• Digital Forensics (Autopsy, FTK Imager)	• Linux & Windows Administration
• Security Policies and Procedures	• Adaptability & Attention to Detail
